

## Assessment Test – I – HTML, JavaScript, CSS

### Question: 4

#### Description:

Create a user list from the data given.

#### Requirements:

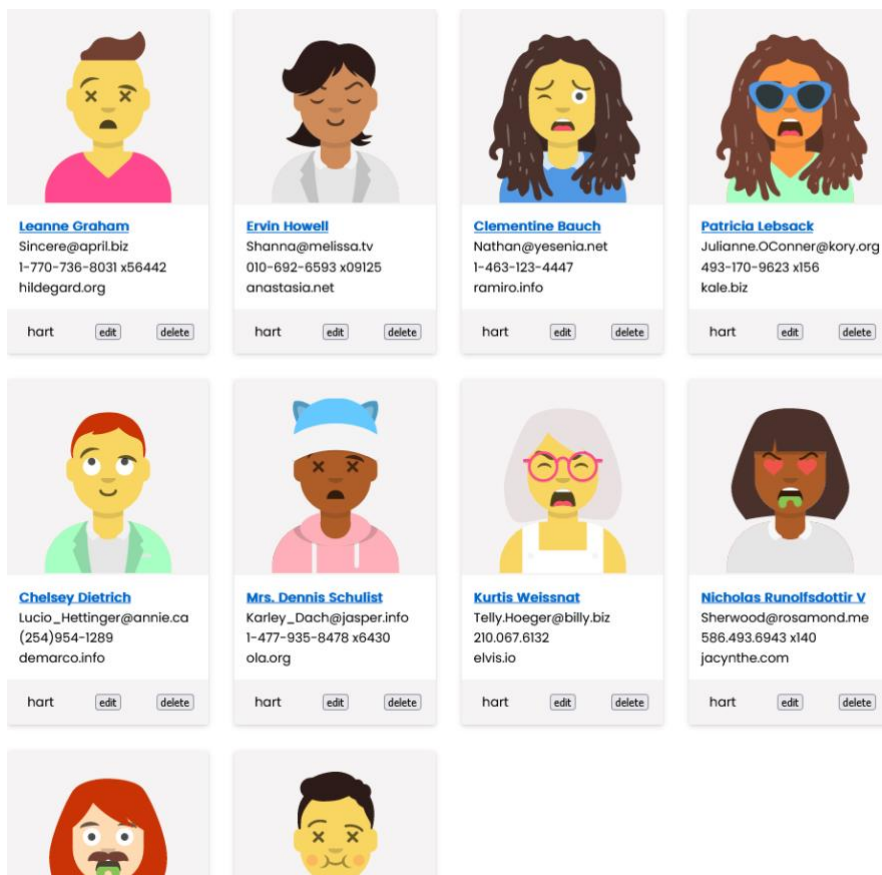

1. Create the simple card to display the user thumbnails.
2. Each thumbnail should consist of edit and delete button.
3. If clicking on the **“Edit”** button the respective user details needs to edit, same if clicking on the **“Delete”** button they should remove from this list.
4. The page should be responsive.
5. On the Edit form should edit the Name, Email, Phone and Web site. This form should have **“Cancel”** and **“OK”** button to proceed. If clicking on the **“OK”** it should save the data to the respective user, if **“Cancel”** simply close the form.

Data URL: <https://jsonplaceholder.typicode.com/users>
